On behalf of staff and students of Boromarajonani College of Nursing, Chiang Mai (BCNC), I would like to welcome you to our college. The BCNC is a higher educational institute in Chiang Mai province. It has served our community for more than 30 years.

We are passionate in finding better ways to educate and train nurses and emergency medical technicians (EMT) and enhance their capacity professionally and competently to contribute to the improved well-being in our community. Our well-qualified staffs and up-to-date facilities position us in the community as a premium provider of delivering quality health care. We are striving for greater achievements and recognition both nationally and internationally.

It is my sincere pleasure to welcome you to BCNC.

Vvaraporn Wanchaitanawong  
Director

### Boromarajonani College of Nursing, Chiang Mai Philosophy

The BCNC is an educational institute that produce and develop nurses and health professionals. Registered nurses and emergency medical technicians (EMT) are mindful and caring, working with compassion as well as having critical thinking, leadership and life long self-learning to enhance their nursing EMT professions respectively.

### Vision

BCNC is a premium college in nursing and EMT to enhance a learning society.

### Mission

Five missions to accomplish are:

- To produce high quality nurses and EMTs
- To develop health professionals
- To research and enhance knowledge management
- To provide nursing and health information locally and nationally
- To practice and disseminate local and national culture

### Belief

The BCNC believes in TEAM

T = Teamwork

E = Ethics

A = Activeness

M = Modernization

### Academic programmes: the BCNC provides two academic programmes:

#### 1. Bachelor of Nursing Science Programme (BNS)

A four-year full-time programme designed to produce quality nursing graduates with strong moral character, a caring perspective that prepares to serve the needs of the society and local communities.

#### 2. Diploma of Emergency Medical Technician Programme (Dip. of EMT)

A two-year full-time programme leads graduates to a career in Emergency Medical Technician. An EMT works with hospital emergency teams to provide Emergency Medical Care in accidents, disaster and other emergency situations.

### Research activities (Activities)

Research and dedicated teams are built upon a collaboration of premium researchers, community leaders, and clinical experts. Our college research strengths include emergency nursing and mental health nursing.

### Facilities

The BCNC offers a variety of working laboratories and demonstration wards for nursing and EMT students and health professionals.

- Science laboratories
- Demonstration wards
- Computer laboratories
- Library
